DC22

The World's Lightest 2-MEGAPIXEL DUAL LAYER Recording DVD Camcorder

The Canon DC22 offers you the ultimate combination of superb image quality, slim and compact stylish looks, and the ultimate in DVD convenience. Not only is the Canon DC22 the world's lightest 2-megapixel DVD camcorder*, it also features the new single-side, dual layer DVD recording for longer continuous video recording of up to 108 minutes.

Offering style-conscious consumers the perfect mix of superb performance and stylish good looks, the Canon DC22 captures true high-resolution 16:9 Widescreen video using a high-magnification 10x optical zoom lens, and a 2.2-megapixel CCD sensor. Canon's superior DIGIC DV imaging processor and RGB Primary Colour Filter ensure superb movies and stills.

SUPER
Slim
DESIGN

Compact enough to fit into any lifestyle, you will want to bring the DC22 with you wherever you go. A complete range of camera functions and enhanced ease-of-use features makes the DC22 a versatile all-round performer for capturing life's precious moments.

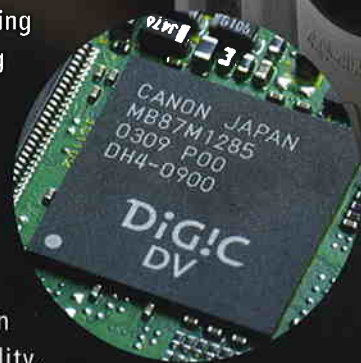

* As at July 2006.

SUPERIOR MOVIES AND STILLS

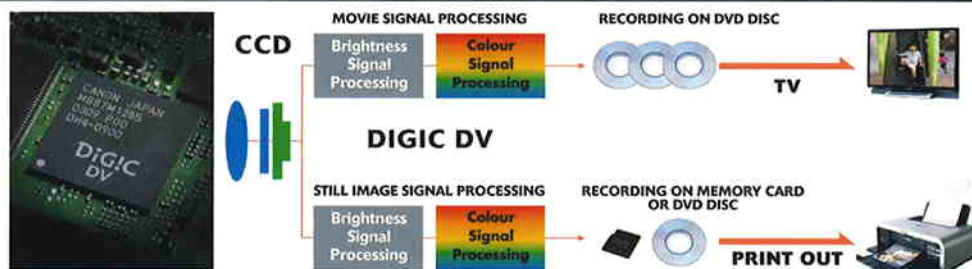

○ DIGIC DV Imaging Processor

Video footage and digital photos each have their different processing requirements. Recognising this, Canon high-performance DIGIC DV imaging processor is designed to process video and stills using two separate paths, thus catering to the unique needs of each, maximising video quality display on TV and still image quality for print or computer display.

DIGIC DV offers exceptionally fast processing power for producing true-to-life video footage and still photographs. With DIGIC DV, you are assured of high resolution and stills with greater depth of detail, colour gradation and a wider dynamic range for truly exceptional image quality.

OPTIMISATION OF MOVIES & STILL IMAGES

DIGIC DV uses separate optimisation processes so that both movies and still images are sharp!

○ Dual Layer DVD Recording

Canon is well known for the quality and innovative features of its camcorders, and for the first time, the DC22 offers Dual Layer DVD recording for ultra convenience and longer recording time. This new media allows up to 1.8x the amount of storage as that of conventional 8cm DVDs (Dual Layer recording capacity: approx.

2.66 GB), or up to 108 minutes (LP mode) of seamless continuous recording time. Dual Layer DVD is compliant with DVD9 format which is compatible with most consumer DVD players and computer DVD-ROM drives, you can immediately playback recorded footage in the comfort of your living room.

○ 2.2-Megapixel CCD

CAPTURING LIFE'S RICH DETAILS

The DC22 features a highly advanced 2.2-megapixel CCD sensor for capturing high resolution image data. This allows you to accurately capture the richness of life with an amazing depth of detail for smooth, natural skin tones, and rich, vibrant colours.

Effective video resolution is approximately 1.77 (PAL) / 1.23 (NTSC) megapixels in the 4:3 aspect ratio. Effective still image resolution is approximately 2.0 megapixels.

○ RGB Primary Colour Filter

The DC22 features an advanced RGB Primary Colour Filter, which separates light into its red, green and blue components for reproducing vibrant images with more natural colour tones. More lifelike colour gradations become possible, most noticeably in skin tones and in images dominated by a single strong colour.
