The World's Smallest & Lightest HDV Camcorder

# CLEARLY THE BETTER HDV CAMCORDER

## HV10 **1920 x 1080** **TRUE FULL HD** **CMOS**

High-definition (HD) performance in the palm of your hands. The Canon HV10 is the world's first consumer high-definition video (HDV) camcorder featuring a **True Full HD CMOS Sensor**. With **1920 x 1080 recording pixels**, the Full HD CMOS sensor records in an ultra-high resolution standard for optimum image quality.

Powered by the superior **DIGIC DV II imaging processor**, the Canon HV10 is equipped with **Instant AF system**, and a Canon **10x optical zoom HD video lens** with **Super Range Optical Image Stabilizer (OIS)** for capturing full colour and detail of life with full clarity. Canon's **RGB Bayer Placement Technology** ensures refined image colour reproduction.

The possibilities of professional HDV recording are now available to consumers in a well-designed and easy to use camcorder. Weighing only 440gm, the Canon HV10 is the **world's smallest and lightest HDV camcorder\*** — so portable and lightweight, you can carry it everywhere with you.

With its superb image quality and extensive range of professional video and stills functions, the HV10 perfectly answers the needs of consumers looking for a HDV camcorder to complement their HDTVs. Now you can impress living room or auditorium audiences with unparalleled image quality. Truly, the HV10 is a marvel of Canon imaging technology.
